Nationality: Swedish

Position: Central Midfielder (No. 6 / 8 / 10)

Club: Lidköpings FK

Report by: ScoutBridge Scouting Department

Senaid Džanić is a highly adaptable and intelligent midfielder who can be used across all three central roles. As a deep-lying No. 6, a two-way No. 8, or a creative No. 10. His game is built on composure, awareness, and a naturally clean technique that allows him to dictate tempo and connect the structure of the team. He positions himself well between the lines, always presenting a passing option, and plays with a maturity.

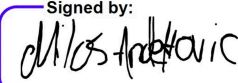

His biggest strength lies in his passing quality. Senaid strikes the ball with firmness and precision, consistently breaking opposition lines and finding teammates in advantageous zones. His right foot is reliable both over long distances as diagonal balls, switches of play, clipped entries and in short combinations where he plays with timing and intention. He often accelerates the team's buildup with first-touch passes and shows an instinctive understanding of when to play simple and when to be more progressive.

In the final third, he carries a real threat. Senaid's long-range shot is well-struck and forces goalkeepers into difficult situations, and he has demonstrated the ability to deliver accurate crosses from half-spaces and wide channels. His contribution in terms of goals and assists is notable for a midfielder, and he consistently arrives in good areas around the box.

Defensively, he works responsibly for the team. He is competitive in aerial duels despite not being physically dominant, and he tracks runners with discipline. He positions himself well in defensive transitions and shows a good sense for when to step in and when to delay.

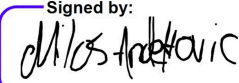

Room for improvement lies primarily in his physical explosiveness. Increasing his acceleration and ability to change pace quickly will raise his impact both in offensive transitions and in defensive pressing moments. This is an area that can elevate him to the next level.

Overall, Senaid Džanić projects as a top Division 3 player already and a strong contributor at Division 2 level. With added explosiveness and continued development, we believe he has the potential to grow into a
