

Scouting Report:

FAVOUR PEDRO

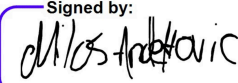

Player Profile: Favour Pedro

Club: Lindome GIF

Positions: Left winger / Right winger / Striker

Favour Pedro is an explosive attacking player whose speed, strength, and directness make him a constant threat in the final third. He times his runs well, stretching defenses both in wide areas and through central channels, and has the versatility to operate effectively as a winger on either flank or as a striker. His physical attributes allow him to dominate in transitions and put opposition defenders under pressure throughout the game. Pedro suits best in a 4-3-3 formation as the left winger however the team at ScoutBridge sees him as a number 9 in a 4-5-1 formation as well due to his speed.

With continued focus on refining his technical ability, Favour has the potential to transform his natural athletic gifts into a well-rounded attacking profile. His pace, power, and intelligent movement already make him a dangerous player at his level, and with development he could build a career in the game.
