

Scouting Report:

DOVYDAS JUOZAPAVICIUS

Date of Birth: 2007

Nationality: Lithuanian

Position: Centre Back / Right Back

Report by: ScoutBridge Scouting Department (Nemanja Popovic)

Dovydas Juozapavicius is a composed and assertive defender who displays maturity and confidence beyond his age. During the 2025 season, he has been part of a senior Division 5 squad, where he has shown the ability to handle physical challenges while maintaining calmness on the ball. Standing at 184 cm, he combines strength, composure, and good decision-making under pressure – traits that stand out for a player of his age profile.

In possession, Juozapavicius demonstrates a clear intention to play forward and build constructively from the back. His passing range is one of his standout qualities; he can switch play accurately, find runners between the lines, and deliver long diagonal passes with precision. He avoids unnecessary clearances, instead seeking progressive solutions that start attacks. On his current level, this ability often sets him apart from his peers.

Defensively, he reads the game well and anticipates danger early. His positioning allows him to intercept passes and engage opponents proactively rather than reactively. He stays tight to forwards receiving with their back to goal and uses his body effectively to regain possession. In duels, he competes with aggression and persistence, and when beaten, he shows good recovery speed and determination to win the ball back.

As a right back, Juozapavicius has shown that he can step forward with confidence, supporting play down the flank and delivering accurate crosses – particularly from deeper areas. His communication and leadership are notable; he regularly directs teammates and maintains a commanding presence in the defensive line, something not always common for players his age.

Areas for improvement include developing greater explosiveness in his jumping and refining his close control under tight pressure. More importantly, he will need to replicate his composure, decision-making, and passing quality consistently when facing faster, more physical, and tactically advanced opposition.

At this stage, Dovydas Juozapavicius is performing well within senior Division 5 football and has the qualities to compete at P19 Division 1 level now. With continued development and exposure to higher intensity matches, he has the potential to progress to senior Division 2 level in the near future – and possibly beyond with the right environment and coaching.

ScoutBridge assessment: Dovydas Juozapavicius is a confident and tactically intelligent defender with the profile of a modern centre back or right back. His passing range, anticipation, and composure are strong foundations, and proving these traits consistently against higher-level competition will be key to unlocking his next step i
