

Scouting Report:

Kibet Too

Date of Birth: 2008

Nationality: Swedish (Kenyan heritage)

Position: Central Midfielder (No. 6 / 8 / 10)

Club: Boo FF

Report by: ScoutBridge Scouting Department

Kibet Too is an intelligent and versatile central midfielder who will represent Boo FF at P19 Superettan level next season. Capable of playing as a 6, 8, or 10, he brings mobility, awareness, and a composed presence in the middle of the pitch.

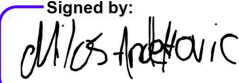

He controls the tempo with maturity, able to drop deep and initiate build-up or advance into higher areas to connect attacks. Kibet's composure in possession is one of his strongest attributes — he often knows his next action before receiving the ball, enabling quick combinations and clean distribution. His one-touch play is efficient and structured.

Technically, he offers a strong passing repertoire. His diagonal passes, especially off his right foot, are precise and well-timed, helping his team progress and switch play effectively. He scans consistently, reads space well, and acts as a natural link in Boo FF's midfield structure. His ball control and small deceptive movements make him difficult for opponents to anticipate.

Defensively, Kibet relies on timing and anticipation, often winning second balls despite not being the most physically dominant. He positions himself intelligently and reads situations early.

Areas for development include physical strength, explosiveness, and aerial ability — key components as he moves toward senior-level football.

With his technical foundation, intelligence, and style of play, we believe he is fully ready for P19 Superettan next season and capable in P19 Allsvenskan. His profile — smart, technical, and composed — is well-suited to future football in the Netherlands or Spain, where tactical understanding and ball security are highly valued.
