

Scouting Rapport:

Kristijan Aleksic

Date of Birth: 2002

Nationality: Swedish

Position: Defensive Midfielder / Central Midfielder (No. 6)

Club: Bergdalen (Captain)

Report by: ScoutBridge Scouting Department

Kristijan Aleksic is a disciplined and reliable defensive midfielder who currently captains Bergdalen and previously captained Norrby at youth level. His leadership qualities are immediately noticeable — he is vocal, instructive, and constantly engaged in organizing teammates, giving structure and stability to his side.

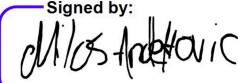

Aleksic's game is built on precision and simplicity. He plays with high passing security, avoids unnecessary risks, and provides balance in midfield. Defensively, he covers spaces effectively and shows strong discipline in his positioning. He is aggressive in duels, works relentlessly, and maintains a consistently high work rate throughout matches. His ability to read danger early makes him a key defensive presence.

On the ball, Aleksic possesses a clean and reliable right foot. His passing range allows him to play simple combinations under pressure or switch play when needed. In transition, he excels in counter-attacking systems: he wins the ball, stabilizes the situation, and distributes quickly and effectively to launch attacks. His profile is reminiscent of players like Casemiro — a midfield stabilizer who prioritizes balance, defensive control, and secure decision-making.

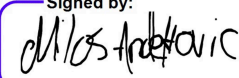

Tactically, Aleksic fits well in a 3-5-2 as the single holding midfielder or in a 4-2-3-1 as one of the double pivots, where his defensive reliability and positional discipline are maximized. He consistently positions himself correctly to protect the back line and provide a central anchor.

Areas for improvement include adding goal contributions — both goals and assists. Increasing his presence in advanced areas, while maintaining balance, would elevate his profile and broaden his opportunities at higher levels.

With a strong and consistent season in Division 2 or Division 3 in 2026, we believe Aleksic has the capacity to reach Ettan level by 2027. His leadership, discipline, and defensive intelligence make him a valuable asset for teams seeking stability and structure in midfield.
